(54) Title: **SHALLOW LOUDSPEAKER**

(57) Abstract: Loudspeaker provided with a frame (101), a membrane (103) and a drive unit (105). The membrane has a flat outer circumferential edge (104a) suspended from the frame, and a flat inner circumferential edge (104b). The drive unit has a stationary part (106a) secured to the frame and a translatable part (106b) provided with a coil support (108b) secured to the inner circumferential edge of the membrane. The membrane includes a concave membrane body (104), which, viewed in a circumferential direction, has a pattern of folds radially extending between the flat inner circumferential edge and the flat outer circumferential edge of the membrane, which pattern of folds improves the stiffness of the membrane.
